### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1- 7, 8-10, 11-12 rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's description of the prior art in view of Guberman et al (US2002/0074937). For claims 1, 8 and 11, the applicant in the background section of the application has described the different types and structure of electrooptic devices, but does not discuss electrically conductive yarns being used in the structure of the devices, however, Guberman et al disclose the use of electrically conductive yarns as an element being used in electrooptic display devices, see the abstract and [0006-0009]. It would have been obvious to one of ordinary skill in the art to use electrically conductive yarns of Guberman et al in the prior art as cited by the applicant because they teach that it makes the devices more flexible but still mechanically stable. Other structural elements or methods claimed in the system are standard in the art, and coatings on the yarn or the use of the yarn as an electrode are obvious design choices that one skilled in the art would use depending on the specific structure needed for the particular electrooptic device.

3. Claims 13 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: In the claimed invention introducing bond points is not shown or suggested by the prior art.
